SUMMARY

Full Stack Web Developer and B.Tech Computer Science student with hands-on experience in building interactive, user-centered web applications. Skilled in UI/UX design principles, problem-solving, and collaborating with teams to develop intuitive and user-friendly digital solutions. Experienced in using AI-powered tools like Antigravity and Claude to enhance development efficiency. Passionate about learning new technologies and continuously improving both development and user experience skills.

TECHNICAL SKILLS

Programming Languages: Java, C, C++

Frontend Technologies: Angular, React, HTML, CSS

Backend Technologies: Node.js, Next.js, Spring Boot, Express.js

UI/UX Design: Figma, User Interface Design

Databases: MySQL, MongoDB, PostgreSQL, DynamoDB

Cloud Technologies: AWS

Developer Tools: VS Code, GitHub, Postman, Firebase, Cursor Ai, Antigravity, Claude

EXPERIENCE

Freelance Full Stack Developer, Self-Employed

2026 – Present | Remote

- Designed and developed full-stack web applications for Plant Nursery, Real Estate, and Travels platforms (xyz plantnursery, xyz realestate, xyz travels), delivering real-world business solutions.
- Deployed applications with a focus on performance, scalability, and clean architecture.
- Built responsive, user-friendly interfaces ensuring seamless cross-device compatibility.
- Applied SEO best practices and integrated third-party services like WhatsApp to boost user engagement.
- Delivered key features such as product showcases, property listings, and service-based platforms with intuitive UI.
- Strengthened skills in modern development tools and AI-assisted workflows, including Antigravity and Claude, while managing the full project lifecycle with clean, well-documented code.

Freelancer - Backend

07/2025 – 09/2025 | Remote

- Developed and maintained scalable backend services using Node.js and Next.js, ensuring smooth integration with MongoDB and DynamoDB for efficient data storage and retrieval.
- Built real-time communication features including chat, voice calls, and video calls by integrating third-party services such as Twilio and Agora, enhancing user engagement and platform interactivity.
- Worked closely with frontend teams to integrate backend APIs, validating all endpoints using Postman to ensure accuracy, stability, and expected behaviour.
- Integrated multiple third-party platforms – such as Firebase, Twilio, Agora, and various custom APIs—to extend system capabilities and improve application functionality.

EDUCATION

B.Tech. in Computer Science and Engineering,
Centurion University of Technology and Management
CGPA: 9.01 (till 7th Sem)

08/2022 – 03/2026 | Vizianagaram

PROJECTS

InternNova

2025 – 11/2025

- This is a real-time web application primarily designed for students. Students can easily connect with real companies and apply for jobs. The system includes three roles: Admin, Company, and Student. The Admin verifies company profiles, and only after approval can companies sign in to their dashboards. Companies can post job openings and manage student applications.
- Tech Stack: AngularJs, NodeJs, MongoDB, Firebase

Online Food Delivery System (UI/UX Design)

2025 – 11/2025

- Designed a complete online food delivery application focusing on user-centered UI/UX principles.
- Created wireframes, user flows, and high-fidelity prototypes using Figma.
- Focused on intuitive navigation, clean layout, and responsive design for better user experience.
- Conducted design improvements to enhance usability and accessibility.
- Developed interactive prototypes to simulate real-time user interactions.
- Ensured consistency in design components, typography, and color systems.

CERTIFICATIONS

- Data Structures and Algorithms, CodeTantra
- Deloitte Australia Technology Job Simulation on Forage

ACHIEVEMENTS

- Secured 4th place in I Love Hackathon, showcasing strong problem-solving, teamwork, and development skills
- Collaborated with a team to design and present an innovative solution under competitive conditions
